Information and
consulting company
for renewable
energies

Shaping the future with experience
- since 2002 -

Professional services for

Institutional investors
Project developers
Asset Managers
Consortia
Operators

Expertise for Developers and Operators of energy plants

- Production site and environment analysis for risk and potential assessment for new projects and project enhancements
- Support during project development, e.g. by initiating contracts on site
- Consultancy for performance and efficiency improvement of bio-gas plants
- Market analysis and bid comparisons for process optimization and technology decision-making.
- Support for sales of energy projects embedded in financially strong networks
- Innovative initiator for project and process flows

Expertise for Asset Managers & Institutional Investors

- Support in the implementation of growth strategies, e.g. in the acquisition of energy projects
- Concept development and implementation of measures for performance improvement of existing energy projects – main focus bio-gas/bio-methane
- Improving the technical and economical results of the project by using proven process management, including active process coordination at the site of the energy projects

Expertise in merger & acquisition services

- Execution of due-diligence processes
- Conduction of on-site inspections to identify deficiencies and the need for investment
- Carrying out opportunity and risk assessments
- Transaction monitoring
- Interactive process implementation in coordination with involved stakeholders
- Support during post-merger integration
- Implementation of projects within the framework of corporate sustainability strategies

greenValue Services develop as dynamically as the market for renewable energies. We participate in and cooperate with regional and international projects and partners with utmost commitment, technical expertise and a strong network.
